General Election to Lok Sabha, 2019

Lok Sabha Election in Manipur has always been keenly contested and has over the years witnessed high voter turnout. With an objective of conducting free, fair and truly participative election, the office of CEO, Manipur, had taken up special measures.

Countless initiatives to achieve higher voter participation like registration of first-time voters, maintaining a healthy electoral roll, inclusion of marginalised sections, EVM and VVPAT awareness programmes, facilitation and ensuring the security of voters on polling day, and a host of steps among others were undertaken.

To make the election process free and fair, several initiatives including training of election officials, adoption of multiple web-based technologies, ensuring safety and security of election officials, live tracking of EVM and VVPAT movements, and facilitation of smooth counting of votes were implemented by the election machinery in the state.

While it wasn't totally unexpected, considering the many measures that were taken up for the first time in the state and the numerous 'extra mile' initiatives that we took, it was very satisfactory to see one of the highest voter turnouts ever recorded in any Lok Sabha Election in Manipur. I cannot but thank everyone involved in the whole process. This report tries to capture the highlights of various stages of the 17th Lok Sabha Election, 2019 in Manipur. I wish the readers an insightful and happy reading.

#### **ELECTION IN MANIPUR:**

Elections in Manipur have always been keenly contested with very high voter turnout. The electorate has, by and large, always been very decisive and local issues have dominated over larger national issues, both in the Assembly and in the Parliamentary elections. The State has two Parliamentary Constituencies - Inner Manipur Parliamentary Constituency (IMPC) and Outer Manipur (ST) Parliamentary Constituency (OMPC). Both PCs are very different from each other. While the IMPC covers 32 assembly segments spread over the valley areas of the State and predominantly inhabited by the Meitei Hindus, the OMPC spread over 28 assembly segments covers all the hill districts inhabited by the tribals who are mostly Christian and eight other assembly segments from the valley. The area of OMPC is almost 10 times that of the IMPC and the hilly terrain, coupled with comparatively poor infrastructure and several pockets affected by insurgency, makes conduct of elections in the OMPC a very challenging task.

In line with the three objectives of SVEEP, CEO Manipur initiated and implemented various activities across the state in preparation for the 17th Lok Sabha Election. Efforts were directed primarily at increased enrollment to achieve 100% EPIC (Election Photo Identity Card) and PER (Photo Electoral Roll) coverage with the eventual goal of increased voter participation.

The CEO made plans to address various other SVEEP goals like informed and ethical voting, voter education, removal of gender gap, increased voter turn-out, etc. Various plans were executed with good results.

All activities in the state were developed using the three-pronged strategy of SVEEP. These activities were targeted at the general public and specific target groups like youth, women etc.

## **RATIONALISATION OF POLLING STATIONS DURING SSR-2019**

Election Commission of India has instructed that a polling station should be provided for not more than 1200 electors in rural areas and 1400 electors in urban areas. Moreover, in view of ever growing strength of electors and various other developments, such as deterioration in condition of existing buildings, availability of suitable building in the locality, status of Basic Minimum Facilities in the polling station, the change in Geographical conditions, change in law and order situation etc., the existing polling stations are required to be reviewed from time to time. Rationalisation of polling stations is conducted generally before every Revision of Electoral Rolls. During an election year the exercise of Rationalisation is necessarily undertaken. Therefore, CEO's Office, Manipur took up Rationalisation of Polling Stations process as per the schedule given by the Election Commission of India during the period of Pre-Revision Activity and before conduct of Elections.

Election Commission of India had directed that voter friendly facilities and amenities should be provided at polling stations. Every District Election Officer has to provide Assured Minimum Facilities (AMF) at these polling stations. Though there were several gaps in AMF the office of CEO along with DEO's ensured that all work related to completion of AMF was finished on time.

#### **REPORT ON VARIOUS IT APPLICATIONS**

#### eAtlas for Incident / Event Reporting Live Monitoring of Polling Updates and Turn-out, Lok Sabha 2019

The office of the Chief Electoral Officer (CEO), Manipur successfully utilized the Election e-ATLAS - an eGovernance dashboard based application, for effective planning and monitoring of the Lok Sabha Election for Outer and Inner Parliamentary constituencies held on 11th and 18th April respectively to capture and instantly report incidents and provide alerts for EVM/VVPAT malfunction using eAtlas Mobile App.

The system also enables instant live visualization of polling updates and turn-out etc. in an interactive digital map format. The eAtlas has been developed by North Eastern Space Applications Centre, Govt. of India in close collaborations with Manipur Remote Sensing Applications Centre (MARSAC), Imphal as per the requirement of CEO office, Imphal.

The eAtlas dashboard contains polling station details, voter count, assured minimum facilities at polling stations, etc. and also important installations like district and subdivisional headquarters, hospitals, roads, intermediate strong rooms, police stations, security establishments which were GPS tagged and mapped in layers on the interactive digital map.

The app version of the e-Atlas was installed in the smart phones of one polling officer of every polling station. The app installed on the smart phones of polling officers was very effective in reporting EVM/VVPAT malfunction and incident alert. The incident reporting tab reported any major incident on poll day from the polling booth with real-time images/picture with short remarks of the incident.

The app was handy on the poll day when all the EVM/VVPAT malfunctions immediately popped up on eAtlast dashboard installed in the control rooms at CEO office and at DEO offices. By clicking on the polling station button on the interactive digital map, the nature of complaint was displayed in a pop-up window. 6 separate teams formed at CEO's office handled the emergency cases and all reported cases were settled within 45 minutes.

This App worked in tandem with the GPS tracking installed in all vehicles of sector officers. Wherever a problem was reported the concerned sector officer was also alerted. In case the problem was not solved through telephonic advice from the control rooms, the sector officers could reach the location and take corrective action, including change of machines, if required. The sector officers were constantly guided from the control room to approach the area where problems were being reported or expected. The system worked very well, and help was provided to more than 100 polling parties on both days of polling.

#### **POLLSTAR-** For Real-Time Voter Turnout Monitoring Application

The office of the Chief Electoral Officer (CEO), Manipur once again successfully deployed Pollstar, a solution offered by BSNL (Powered by DSNL, a leading Command, Control, Conference (C3) service provider in India), for effective monitoring of polling activities on pre-poll and poll-day for the Lok Sabha Election, 2019 for Outer and Inner Parliamentary constituencies held on 11th and 18th April, 2019. The solution was previously deployed in Tamil Nadu, Karnataka, Goa, Mizoram, Manipur, Nagaland and Telangana Assembly Election.

Pollstar App was used for the first time in the SAE 2017 with limited success. In LSE, 2019 a team from CEO's office visited DSNL (the company that developed Pollstar) office at Chennai for detailed discussion on the customization required for the State. After several rounds of discussion, the app was finalized and ready to use.

PollStar was able to reach tens of thousands of polling officials within minutes and collect and compile realtime data like safe arrival, polling station set-up, mock-poll, EVM resetting and poll day's two hourly voter turnout. The data from polling officers was collected using Pollstar app version for those using smartphone and through conventional IVR phone calls for those without smartphones.

The LIVE progress reports collected were monitored on the Pollstar's dashboard by CEO office, District Electoral Officers, Returning Officers and other stakeholders. Out of 1562 polling stations in Phase-1 and 1300 polling stations in Phase-2, Pollstar consistently reached on both the poll days. Hourly voter turnout was received from an average of 86% polling stations. The system also enabled and tracked arrival of polling parties and conduct of mock poll and the start time of actual poll.

The poll percentage was carefully monitored through the Pollstar App. Any doubtful percentage (Very high or Very low) was immediately verified over telephone. All complaints and counter-complaints received from political parties, candidates or their agents were verified without delay through field functionaries and in most cases, response was also provided to the complainants on the poll day itself. In left out cases, the ROs and DEOs verified the complaints and submitted their reports. Detailed monitoring mechanism for all complaint was set up under supervision of the Additional CEO and all complaints were disposed of in time by the ROs concerned.

Chief

The Chief Electoral Officer, Manipur developed a web-based randomization software to cater to the local requirements as well as need for special cases related to difficult hilly terrain locations of the Polling Station where dispersal takes place on P -2 or P -3 days. The required age and physical fitness for these polling personnel were considered.

#### Key features & functionalities:

- RSPP applications provide complete functionalities of Randomization viz. Polling Personnel Randomization, • Police Personnel Randomization and Counting Personnel Randomization.
- Centralised hosting is done at National Informatics Centre Manipur State Unit, Imphal. No need to maintain servers, storage etc., at District level.
- Polling personnel are dispatched two to three days ahead for Polling Stations located in difficult hilly terrain.
- Staff are deployed through three stages of randomization.
- RSPP also provided exemption feature based on medical ground.

#### **Polling Personnel Randomization:**

In the first stage, polling parties are constituted randomly with the help of RSPP software. The process involves randomly picking at least 20% more officers than the required number, then this group is trained for election duty.

In the second stage, polling parties are formed from this group of trained officials. This process also involves randomization through RSPP software. However, in the second stage General Observers appointed by Election Commission were involved to ensure the integrity of the randomization process.

In the third stage of randomization, polling booths are randomly assigned polling parties just before their departure. It means, these randomly created polling parties do not know the specific polling booths where they will be deployed till the time of their departure.

#### **Police Personnel Randomization:**

Similar three-stage randomization was conducted for police personnel as well.

#### **Counting Officials Randomization:**

The counting officials randomization was also done in three stages.

In First randomization, a list of 120% of the required number of officials (Counting Supervisors/Counting Assistants/ Micro Observers) required for counting in the district, are generated (including reserve) randomly, using the RSPP software by the District Election Officers one week prior to the date of counting. Presence of observers is not required at this stage. This is only to identify and select the officials that would be given duty for counting as Counting Supervisors/Counting Assistants/Micro Observers. In no case, at this stage, the identity of the assembly constituency to which the Counting personnel are likely to be deployed are disclosed. The appointment letters are issued by the RO concerned.

The Assembly Constituency wise randomization i.e. Second randomization was done by the District Election Officers in presence of Observer(s) 24 hours prior to commencement of counting. Thereafter, the Returning Officer issued the appointment letters to these officials intimating them about the concerned allotted ACs.

In Third randomization, the allotment of counting tables in the counting hall, to the Counting Supervisors/Counting Assistants/Micro-Observers was done in the presence of ECI Observer at 5.00 AM on the day of counting.

### HELICOPTERS AND AIR AMBULANCE

State Election Department submitted a proposal for Airlifting of Polling parties as well as Air Ambulance to the Election Commission of India. Further, State Home Department took up the matter with the Ministry of Defence indicating the requirement of Helicopters. Election Commission of India conveyed acceptance to the proposal from the State vide letter No. 464/L&O/2019/EPS dated 1st April addressed to the Joint Secretaries of MHA & MoD. The following Polling Stations were proposed for Airlifting of Polling parties.

### DISPERSAL OF POLLING PARTIES

There are some polling stations located in the far flung remote areas under No. 2-Outer Manipur (ST) Parliamentary Constituency. To reach these polling stations polling parties have to use different means of transportation, say by vehicles/boats/foot and took around 36 to 40 hours. Therefore, polling parties of these polling stations have to be dispersed 2/3 days before poll. The following number of polling parties were dispatched on P -1, P -2 and P -3 days.

SI. No.	District	P -1 Polling Station	P -2 Polling Station	P -3 Polling Station	Total
